

Handheld Microphone

M-950ED

INSTRUCTION MANUAL

www.bbsprosound.com

SPECIFICATION

System Specifications

Carrier Wave Frequency Range	766.5~770.25MHz
Frequency Oscillation Mode	PLL module locked loop design
Channels	16 CH
Frequency Responses	50Hz—18KHz
Working distance	200 feet

UHF PLL Handheld Wireless Microphone

Dynamic Range	>110dB
Stability	±0.005%
Frequency Deviation	±48KHz
Spurious Emissions	<-63dB
Radio Frequency Output Power	10mW
Power Consumed	≤100mA @ 3 V
Battery	* UM3, AA 1.5v ×3 *
Display	LED

Handheld Transmitter

- ❶ Power On/Off switch
- ❷ Set button
- ❸ LED display

FCC INFORMATION

Warning: Modifying, tampering and/or adjusting this or replacement of any transmitter component (crystal, semiconductor, etc.) in this unit could result in a violation of the rules. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC NOTICE

This wireless microphone system complies with Part 74 of FCC Rules. There are four frequencies available for the system. You must get a license for each frequency you plan to use before you use the system (one license can include four frequencies).

Visit <http://wireless.fcc.gov/uls/> to access the license online or phone the nearest FCC offices and contact them to get the necessary application. Licensing depends on how you will use the system

RF EXPOSURE

This wireless microphone contains a low power transmitter. When the power is on, it sends out radio frequency (RF) signals. In August 1966, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for wireless devices.

IMPORTANT NOTE: To adhere to the FCC RF exposure compliance requirements, no change to the antenna or the unit is permitted. Any change to the antenna or the unit could result in the system exceeding the RF exposure requirements.
